Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claim 13 has been rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The chamfer has not been shown nor discussed with respect to the embodiment shown in figure 1. What function does the chamfer perform? What shape does the chamfer take? Where is it exactly located?

Drawings

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the chamfer in the embodiment in figure 1 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended, replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure

is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not acceptable by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

4. The disclosure is objected to because of the following informalities: the reference to the claims in the specification are improper.

Appropriate correction is required.

Election/Restrictions

5. Claims 11 and 14-23 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 2/21/06.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3677

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-5, 8 and 10 have been rejected under 35 U.S.C. 102(b) as being anticipated by Law, 4793155.

Regarding claim 1, Law discloses an item of jewelry (22) fastened to a jewelry element (20). The jewelry item includes a setting (29, 32) with a support part (32-34) and a fastening device (48) with an externally actuatable leaf spring (62) including a latching element (65) on the latch spring (62). The jewelry element (22) includes a recess, i.e., the recess formed between elements 58, which cooperates with the latching element (65).

Regarding claim 2, Law discloses an actuation element (64).

Regarding claim 3, Law discloses an actuation element in the form of a lever (64), which is perpendicular to the extension direction of the latching element (65), i.e. the direction into and out of the page in figures 2 and 5a.

Regarding claim 4, Law discloses a notch (35) in the support part.

Regarding claim 5, Law discloses a groove (63, figure 4) in which the end of the leaf spring (48) is embedded.

Regarding claim 8, Law discloses a cylindrical bore as the aperture in the support part (32, figure 1).

Regarding claim 10, Law discloses a setting capable of receiving a precious stone or a pearl instead of the decorative dome (37).

Allowable Subject Matter

8. Claims 6, 7, 9 and 12 have been objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
